

Newick

Version 1.0.0, by Giorgio Bianchini

Description: Opens a file containing one or more trees in the Newick (-with-attributes) format. Safe even when opening huge files.

Module type: FileType

Module ID: 79dfb9b2-ff10-4ed9-aa74-f7b3ae93c3d2

This module is used to read files in the Newick (-with-attributes) format (see [this link](#) for further information on this format).

To avoid memory overflow issues, the module does not read all the trees from the file into memory at once; instead, it only reads them one at a time when requested by the chosen Load file module.
